

City of Cherryvale Water Utility Leak Adjustment Policy

A water utility customer who has been on current service with the City of Cherryvale for a period of 6 months will be entitled to one water consumption leak adjustment per year. The year will be counted from the date of the last leak adjustment.

Once a leak has been identified it must be repaired in a timely manner.

1. The leak adjustment shall be calculated as follows:
 - a. Use the amount of the meter reading for the period with leak. Subtract the previous months meter reading. This will give the amount of water that ran through the meter for the month.
 - b. Subtract the amount of the average water consumption for the past 6 months, excluding the month with the leak.
 - c. The amount of water in excess of the average will be charged per 1,000 gallons at the rate the City pays per 1,000 gallons to the Public Wholesale Water Supply District for the water.

Leak Adjustment Application

Date: _____

Account: _____

Name: _____

Address: _____

In making application for a leak adjustment I, the undersigned, do hereby agree that I have been a current utility customer with the City of Cherryvale for at least 6 (six) months and that I will only be entitled to one water consumption leak adjustment a year, to be counted from the date of this leak adjustment.

I, the undersigned, do hereby agree that once the leak has been identified, I will repair it in a timely manner.
